The American Telegraph Company was one of the early major players in the development of the US telegraph system with strength in eastern US. In the 1850's, a transatlantic cable between UK and North America was planned, to run via Newfoundland and Cape Breton to the mainland at Sydney NS from which it branched through Sackville NB west to Canada and south to the US. To gain necessary access to the lines, American Telegraph leased from Montreal Telegraph Co., its lines which route from Sarnia through Sackville and into Nova Scotia. Eventually in 1858, it acquired the Canadian company. In turn, American Telegraph was taken over by Western Union which by the completion in 1866 of the international cable had acquired almost all its competitors.

This is a rare Admiral cover: This envelope was made of heavy paper stock which would permit a more substantial enclosure to survive the wear and tear of postal handling and allowed postal inspection. The content was likely a small religious trinket or pendant and as such was merchandise and could be sent at the 4th class matter rate (1¢ per ounce only possible between 1 JA 1912 and 13 FE 1913 – Then, the rate was replaced by Parcel Post at the minimum rate for merchandise of 5¢). If it contained printed matter, and there is no evidence of this in the form of folds, the cover could also be sent at the 3rd class matter rate up to 4 ounces. The strike of the roller is somewhat irregular suggesting some hard content pointing to the possible merchandise content. A great example of the most basic 1¢ per ounce 4th class matter rate. A long description for what it looks like an ordinary 1¢ Admiral cover, nope, it is a seldom seen, hard to find Admiral cover and a great item for an exhibit or non-letter rate presentation. \$100.00 **SOLD**

About 100 miles south of Calgary. It is a 4th class matter rate for 12 to 13 ounces. This merchandise rate was effective from JA 1 12 to FE 13 14. Two things: This tag was mailed shortly after the beginning of the Admiral era and prior to the re-introduction of Parcel Post. Firstly the 1¢ stamps are from the sheet plates and of the original die. The 1¢ die was retouched and by 1913 stamps from the retouched die were in common use in larger post office such as Calgary. Then, when parcel post was introduced on FE 14 14, there was no 13¢ parcel rate for a parcel mailed in the same province and to be sent more than 20 miles from the office of origin. This includes any combination of possible indemnity fees. A very pretty 4th class matter rate Alberta use. \$200.00
